Copper Brake Pipe 1/2" x 25ft 1pc

This seamless 1/2” C106 copper pipe is ideal for replacing damaged or deteriorated brake pipe. Perfect then for repairing an MOT failure. Pliable, meaning that it is easy to bend, shape, and fit to a vehicle. As the copper is softer than steel pipe, it also makes it easier to flare in preparation for connecting it into the brake system. It is supplied in 25ft rolls, and is available in a range of diameters. It conforms to BS EN 12449 – BS 2871, has a safe working pressure of 1900psi, and is manufactured in the UK.

Additional Information

- Copper brake pipe.
- Soft Annealed 22 Gauge.
- Suitable for use on Fluid Control systems.
- Roll 25ft.
- 1pc.
