

Fil électrique unique noir paroi fine de 2mm² - 28/0.30 -

A 50m reel of low voltage, thin walled black single core cable for use in automotive and marine applications, for temperatures up to 105°C. Consists of conductors of stranded copper wire which are PVC insulated. The thin insulation and higher current capacity reduces weight and volume, ideal for more modern vehicles with greater electrical requirements. All Connect automotive cables meet all current and relevant European & British standards, including ISO6722:2006 Class B.
