

Brake & Air Line Sealant C572 65ml 1pc

The professionals choice of workshop anaerobics and adhesives made in the UK. White pipe sealant is designed for the locking & sealing of metal pipes & fittings - the product cures when confined in the absence of air between close fitting metal surfaces and prevents loosening and leakage from shock & vibration. The thixotropic nature reduces the migration of liquid product after application to the substrate. Colour:White. Strength:Low. Viscosity:20,000 cps. Breakaway:6Nm. Gap fill:0.4mm.

Additional Information
