

Cosses à sertir mâle pour connecteurs electriques

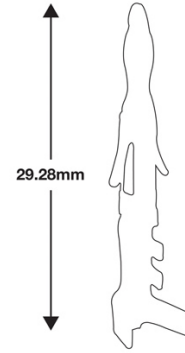

Weatherproof connectors are used to protect cable connections against the elements. To be used on 1.5mm² - 2.5mm² cable. These weatherproof connectors are used on sensors, light bars, head lights, electric windows and most under the bonnet applications. By crimping the green seal onto the non-insulated terminal and cable then clicking the terminal into the housing this then creates the seal. For the perfect crimp our Laser Part No. 7248 needs to be used. The ratchet crimp has unique wide stepped jaws which unlike other tools crimps the terminal and seal without crushing the terminal out of shape. Not only does the tool crimp the large lugs around the seal and cable but it crimps the two smaller lugs around the cable to give a tidy professional crimp. Our crimp tool Part No. 7248 also comes with a terminal removal tool.

Additional Information

- Cosses à sertir étanche Delphi
- Cosses à sertir mâle non isolées
- Convient pour une taille de câble de 1.0mm -2.0mm
- Fourni sous blister
- 100 pcs
