

Assorted VW Group Electrical Connector Kit 6.3 Series

Popular assortment of replacement electrical sensor connectors for Audi, Seat, Skoda and Volkswagen. This assortment contains both the male and female connectors along with the non insulated terminals and seals to make the connection waterproof. Sensors can be used in any area of the vehicle but are mainly used in the engine bay to protect circuits and important sensors for the engine management system. Suitable for use with Laser Tools part nos. 7293, 6547, 3932, 3984 & 4027. This is an ideal assortment for any automotive electrical engineer working on sensor or harness repairs. And, as with other Dealer No More Kits, all of the contents are available as replacement blister packs so the box can be refilled, offering a great cost saving solution versus potentially expensive replacement main dealer parts.

Additional Information
