

Assorted Open Ended Midi Fuses 28pc

A mixed set of open ended midi fuses from 30 - 150 amps. Standard midi fuses have a 'bolt type' fixing which need to be fitted over the post connector. This open ended style, with cut-outs on the fixing head enables fuses to be easily changed without removing the fixing bolts, saving time.

Additional Information

- Kit contains OE midi fuses: 30, 40, 50 amp (4 of each); 60, 70, 80, 100 amp (3 of each); 125, 150 amp (2 of each).
