

Self Amalgamating Tape 19mm x 5m 1pc

Instructions for use: Ensure surfaces are thoroughly clean and dry. Peel back liner and apply tape to pipe or surface. When applying, make sure you stretch the tape 2 to 3 times its length and overlap the tap by 50%. For hoses we recommend 3/4 layers. For the extra security, use cloth / gaffer tape in addition.

Additional Information

- Self-amalgamating tape is a non tacky silicone rubber tape.
- Stretched and wrapped around cables, electrical joints, hoses, pipes.
- Creates a strong, seamless, rubbery, waterproof, electrical insulating layer.
- Heat, sunlight and weather resistant.
- Supplied in a poly bag.
